ATLAS SEVERE WEATHER INFORMATION

Atlas structures are all delivered and certified to AS1664 (Design) and Wind Load AS1170-2.

The PVC cladding of the marquees and structures is not required to be designed to the same wind loads. All PVC clad structures must be evacuated at a wind speed of excess of 80km per hour. This is required as PVC cladding does not provide protection from airborne materials.

CAUTION

- At high winds, it is recommended that all openings of the structure are closed when winds exceed 80km per hour.
- Ensure light equipment on site is secured to prevent the items becoming airborne.
- Wind gusts may exceed structure design loads. The PVC cladding is designed to shred to reduce loads. This is acceptable of winds beyond 120km per hour.

IN THE EVENT OF EXTREME WEATHER

We recommend you have an evacuation plan in place
